DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to a method for detecting a mutation in PAMP, classified in class 435, subclass 6.
 - II. Claims 8-9, drawn to a method of identifying a compound useful in treating a neuropsychiatric disorder using transgenic animals, classified in class 800, subclass 3.
 - III. Claims 10-11, drawn to a method of identifying a compound useful in treating a neuropsychiatric disorder using a reconstituted system for measuring PAMP activity, classified in class 435, subclass 4.
 - IV. Claims 12-14, drawn to a method of identifying a compound useful for treating a neuropsychiatric or neurodevelopmental disorder by contacting a complex between PAMP and an agent with a test compound, classified in class 436, subclass 501.
 - V. Claims 15-16, drawn to method for treating a neuropsychiatric or neurodevelopmental disorder, classified in class 514, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different

inventions have different modes of operation and different effects. The method steps for each invention are different, and require different reagents, reaction conditions, and reaction parameters. Further, the steps of each method are not required or capable of use in any of the other methods.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-V, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
